

RED 40 See-Thru

Rectangular European Design.

Modern design is all about innovative, non-traditional shapes and materials that create an atmosphere of style and sophistication. The RED 40 See-Thru is setting the standard for custom linear gas fireplaces. With a variety of stone and glass media options, and customisable accent lighting to further enhance the impact, the RED 40 See-Thru presents a definitive design statement, and further consolidates our brand promise - NO ONE BUILDS A BETTER FIRE!

FRAMING SPECIFICATIONS

PLEASE NOTE

- Unit **must** be installed prior to plastering.
- Frame opening is greater than plaster opening.

Dimensions above are in millimetres and for reference only. We recommend measuring individual units at installation stage.

Refer to installation manual for detailed specifications on installing this product. **Heat & Glo reserves the right to update units and specifications periodically.** The flame and ember appearance may vary based on the type of fuel burned and the venting configuration used. Photos in this brochure may vary in colour and dimension (size) from the actual product.

Balanced Flue Gas Fireplace

A completely sealed system, the Heat & Glo balanced flue gas fireplace draws 100% of combustion air from outdoors and exhausts all combustion byproducts back outside, with no effect on indoor air quality. Cold air drafts are also eliminated and heat output is maximised. Top or rear flueing technology, another Heat & Glo innovation, provides even greater placement flexibility.

IntelliFire Plus™ Ignition System

The IntelliFire Plus™ Ignition System is an "intelligent" control system providing energy conservation and the comfort of a roaring fire, all at your fingertips! IntelliFire Plus™ eliminates the need for a continuously burning pilot light, reducing gas consumption and lowering operating costs.

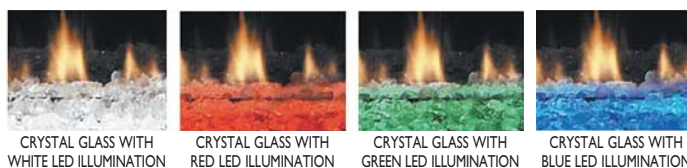

RED 40 ST-AU Features

- Top or rear venting options provide installation flexibility
- Zero clearance provides ease of installation and costs savings
- IntelliFire Plus™ ignition system
- Choice of fronts to complement the Crystal glass media
- Balanced flue technology provides a sealed combustion chamber, maintaining indoor air quality
- Selection of accent lighting options to enhance visual impact
- Optional Heat Zones (2 per unit) to maximise heat distribution
- 205mm top or rear flueing
- Approval No: GMK 10107

Media Options

The area around your flames can adopt many dramatic appearances. Create a 'fire & ice' effect with crystal glass media - enhanced by a range of amazing accent colour lighting options... OR enhance the visual impact by adding the distinctive look of ceramic pebbles to the display.
